Bengaluru, India
Phone: +91-9560015184
Email: rohitrai1310@gmail.com

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 11+ years of experience in Cloud Platform Engineering, Kubernetes operations, CI/CD architecture, OpenStack, and large-scale infrastructure environments. Currently part of IBM Cloud VPC Platform Team, leading Kubernetes-based platform deployments, new region/mzone bring-up, CI/CD ownership (Jenkins & Tekton), automation engineering, and production-grade release management. Strong expertise in platform reliability, incident response, automation using Python, and multi-region infrastructure scaling.

CORE SKILLS

- Cloud & Platform: IBM Cloud VPC, OpenStack
- Containers & Orchestration: Kubernetes, OpenShift
- CI/CD: Jenkins, Tekton (OnePipeline), Release Orchestration
- Automation: Python, Bash, Ansible, Terraform
- Infrastructure & OS: RHEL, CentOS, Ubuntu
- Production Operations: PagerDuty, Incident Management, RCA
- Networking: DNS, Cisco switches, TCP/IP

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- Red Hat Certified OpenShift Administrator
- Red Hat Certified Specialist – OpenShift Virtualization
- RHCSA -RHEL
- RHCSA -OpenStack
- Red Hat Certified Engineer (Ansible)
- CCNA Routing & Switching

PROFESSIONAL EXPERIENCE

IBM Cloud – Devops Engineer| VPC Platform Team

- **Led end-to-end regional expansions** for IBM Cloud VPC (WDC, Madrid, Dallas DC), managing infrastructure readiness and zero-impact production cutovers.
- **Architected Kubernetes control**-planes and networking configurations for global-scale compute services, managing clusters with 1,000+ worker nodes.
- **Reduced deployment windows by 40%** by re-engineering CD pipelines to parallelize zone/zonelet rollouts across complex regional topologies.

- **Modernized CI/CD infrastructure** by using Terraform to migrate legacy Jenkins workflows to IBM OnePipeline (Tekton), automating toolchain creation.
- **Developed Terraform-managed health checks** for Next Gen Data Centers (NGDC), executing hourly validations of pod readiness and node status.
- **Engineered GitOps regional promotion** using K8s CronJobs and Bash to automate delta comparisons and PR creation between environments.
- **Automated release validation** via Tekton, implementing environment locking and automated testing for PR auto-merging across global regions.
- **Decreased release cycle times by 1+ hour per PR** by implementing label-driven "skip-pre-check" logic for back-to-back regional deployments.
- **Developed Python-based security monitoring** to audit HashiCorp Vault secrets, triggering Slack alerts 5 days prior to certificate expiration.
- **Built Python health-check suites** to automate real-time validation of pod status, node readiness, and control-plane stability.
- **Optimized CI/CD workflows** using Jenkins and Tekton, introducing label-based skipping to bypass validated zones during deployment reruns.
- **Managed 24/7 high-availability operations**, leading incident triage, RCA, and rapid recovery via PagerDuty for critical VPC services.
- **Improved MTTR and platform stability** by partnering with SRE teams to enhance monitoring coverage and proactive alerting thresholds.
- **Collaborated with Networking and Security teams** to ensure architectural compliance, service onboarding, and strict regulatory readiness.
- **Scaled global compute capacity** by automating node provisioning and edge-layer expansions to meet increasing workload demands.
- **Standardized deployment orchestration** across Pre-Integration, Staging, and Production, ensuring consistency in microservice delivery.
- **Enhanced developer productivity** by building self-service automation tools that reduced manual infrastructure overhead by 30%+.
- **Implemented automated rollback strategies** and validation gates to significantly reduce change failure rates in production environments.
- **Successfully operationalized multiple cloud regions** with production-grade reliability, contributing to the growth of IBM Cloud VPC.

Nokia (Tech Mahindra Payroll)

Kubernetes Deployment & Administration Engineer | Dec 2021 – Nov 2022

- **Provisioned and deployed Kubernetes clusters** on bare-metal Dell R650 servers, managing low-level BIOS configurations, RAID setups, and firmware upgrades.
- **Orchestrated application delivery** using Helm, managing critical Kubernetes resources including ConfigMaps, Secrets, and persistent storage solutions.
- **Implemented observability stacks** by installing and configuring the ELK (Elasticsearch, Logstash, Kibana) stack within production Kubernetes clusters.

- **Executed platform optimization and security** through cluster hardening, dynamic scale-in/scale-out operations, and rigorous acceptance testing.

OpenStack Deployment & Administration Engineer | Nov 2020 – Nov 2021

- **Provisioned high-performance Kubernetes clusters** on bare-metal Dell R650 servers, managing full-stack infrastructure including BIOS configuration, RAID setup, and firmware upgrades.
- **Architected and managed OpenStack clusters** using OOO methodology, integrating VNFM/NFVO components and scaling compute and storage within NFVI environments.
- **Optimized platform operations** by deploying ELK observability stacks, managing Helm-based application delivery, and executing rigorous cluster hardening and acceptance testing.

VNFD Developer | Mar 2020 – Oct 2020

- **Engineered VNFD (Virtual Network Function Descriptor) packages** for firewall-based telecom workloads using Ansible and Bash, streamlining automated VNF deployments.
- **Developed modular, idempotent Ansible playbooks** for end-to-end VM provisioning, security hardening, and complex OS-level configurations across global environments.
- **Architected infrastructure-as-code (IaC) solutions** using HOT (Heat Orchestration Templates) and TOSCA to automate provisioning within OpenStack environments.
- **Optimized performance and security** by building customized CentOS images and integrating automated network/firewall configuration for production-grade reliability.
- **Led end-to-end validation and handover**, executing functional testing and troubleshooting in staging to ensure seamless production cutovers and team knowledge transfer.

RADCOM Ltd

OpenStack Deployment Engineer (Onsite: Israel & Manila) | Sept 2019 – Mar 2020

- **Deployed RHOSP13 in production environments**, successfully integrating bare-metal servers using OpenStack Ironi.
- **Architected Heat templates** for automated infrastructure orchestration and performed deep-stack analysis to resolve complex onsite deployment issues.

Ericsson Global India Pvt Ltd

OpenStack Administrator | Jan 2017 – Aug 2019 (Onsite: Egypt)

- **Managed multi-customer OpenStack cloud environments**, designing network subnet allocations and creating Heat templates for resource orchestration.
- **Deployed Virtual Network Functions (VNFs)** via Horizon and CLI, overseeing full VM lifecycle operations in high-availability environments.

Linux Administrator | Dec 2015 – Dec 2016 (Onsite: Taiwan)

- **Installed and configured Linux systems** tailored for telecom-specific environments, ensuring high-performance server stability.
- **Managed DNS, AAA, and VO-WiFi services**, performing end-to-end troubleshooting to maintain critical network service availability.

Orange Belgium | Network Engineer | July 2014 – Dec 2015

- **Architected a scalable 4G SecGW** (Security Gateway) solution on AWS, utilizing Terraform to provision complex multi-interface VPC environments for LTE traffic isolation.
- **Automated the deployment of virtualized telecom** workloads using AWS CodeDeploy, ensuring consistent configuration management across elastic EC2 fleets.
- **Engineered dynamic scaling for LTE signalling** traffic by implementing Auto Scaling Groups driven by custom network metrics, maintaining 99.99% availability during peak loads.
- **Integrated automated health-checks** and validation via Python scripts to monitor S1-interface readiness and IPsec tunnel stability post-deployment.

Education

- B. Tech Electronics & Communication (2010-2014) -Inderprastha engineering college.
- Intermediate (2009) from UPC
- Matriculation (2007) from UPC
